MSU INTERNATIONAL DEVELOPMENT PAPERS

Carl K. Eicher, Carl Liedholm, and Michael T. Weber
Co-Editors

The MSU International Development Paper series is designed to further the comparative analysis of international development activities in Africa, Latin America, Asia, and the Near East. The papers report research findings on historical, as well as contemporary, international development problems. The series includes papers on a wide range of topics, such as alternative rural development strategies; nonfarm employment and small scale industry; housing and construction; farming and marketing systems; food and nutrition policy analysis; economics of rice production in West Africa; technological change, employment, and income distribution; computer techniques for farm and marketing surveys; and farming systems research.

The papers are aimed at teachers, researchers, policy makers, donor agencies, and international development practitioners. Selected papers will be translated into French, Spanish, or Arabic.

Individuals and institutions in Third World countries may receive single copies free of charge. See inside back cover for a list of available papers and their prices. For more information, write to:

PREFACE

There is a worldwide revolution in small computer technology underway and scientists are struggling to find ways to utilize this new technology to help solve development problems in the Third World. We are pleased to announce a number of papers on microcomputers in international agriculture will be published in our International Development Papers series. The aim of these papers is to provide timely information about the rapidly changing state of the new micro-processing technology and its use in research. The papers are also intended as guides to agricultural and social scientists on choosing, installing, and maintaining microcomputer hardware and software systems in developing countries.

Some of the papers will also document field experiences of selected established projects using new data processing hardware and software. Other papers will concentrate on developing guidelines for establishing and maintaining successful microcomputer and/or programmable calculator installations for agricultural research in developing countries.

The present paper is a 1984 update of the second of these papers. It is based on staff work by faculty members and graduate students of the Department of Agricultural Economics, Michigan State University, on cost-effective data collection, management, and analysis techniques for developing country applications. The author of this paper, Dr. Thomas Stilwell, has developed considerable experience in using microcomputers in agronomic research through his work with CIMMYT (International Maize and Wheat Improvement Center) and the Consortium for International Development in Bolivia. Dr. Stilwell was a Visiting Associate Professor at Michigan State University when this report was developed.

Readers are encouraged to submit comments about these papers on microcomputers and to inform us of their activities in this area. Write directly to: Dr. Michael T. Weber, Co-Director, Food Security in Africa Cooperative Agreement, Department of Agricultural Economics, Michigan State University, East Lansing, MI 48824-1039.

Explanation of Periodical Listing	3
Periodical Listing	6
Classification by Specialty	78
Classification by Country	82
Trademark Information	87

INTRODUCTION

This listing of periodicals grew out of the need to provide agricultural scientists and other researchers in developing countries with timely information about the rapidly changing world of microcomputers. Because the technology is evolving so rapidly there are very few up-to-date books on microcomputers and related software. One of the best sources about new and existing hardware and software is in periodicals such as magazines, journals and newsletters. Unfortunately most scientists in developing countries are not aware of what periodicals are available. This directory has been compiled to help increase their awareness of what is currently available on the world market.

Only magazines, journals and newspapers have been included in this listing. There are also a few electronic publications, such as CLOAD, which are published on a computer cassette or diskette. Newsletters have not been included because of the large number involved. If you have a computer or application which is not covered by one of the publications in this directory, there is almost certainly a newsletter that does cover it. A source of information about over 1500 newsletters is the Computer Newsletter Publisher's Directory published by Andrew Alaways; 306 West 46th Street; New York, NY 10036; USA.

Many sources have been used to compile this directory. Standard periodical directories were consulted, a large number of individuals in various countries were personally asked for input and much information was obtained from notices published in magazines. Wherever possible a copy of the periodical was obtained and reviewed. In some cases this resulted in that periodical being deleted from the directory, most often because it did not have sufficient content about microcomputers.

The entire industry of microcomputer publications changes so rapidly that even on-line databases cannot keep up. Since this report went to the printers several new magazines have appeared and a few old ones have stopped publishing. Most have made small adjustments in their subscription rates. If you know about a microcomputer magazine not included in this listing send us the name and address, or even better, a sample copy. If you disagree with the comments or other information by all means send a note. A revised edition will be published in 1984.

Most periodicals in the listing are written for a certain group of readers, such as farmers or businessmen. Where possible we have included a brief description of the magazine or journal. Some periodicals such as CLOAD or I.B. Magazette are cassette or diskette periodicals. There may be some paper advertising or information included with these periodicals but the principal items are the files of programs or articles which are 'read' using the appropriate computer. These are extremely useful for building up your program library.

This listing of microcomputer periodicals is intended to serve as a source of basic information. Before you pay for a subscription get a sample copy, even if you have to pay for it. Your needs for a periodical are different from others and it is best to look before you spend a large amount of money for something that does not satisfy your needs.

EXPLANATION OF PERIODICAL LISTING

Each periodical in the following section is listed in alphabetical order. Where possible, the title is reproduced as it appears on the cover of the periodical.

ADDRESS

The address shown is normally the address for subscription information. Many times this is different from the editorial staff address and even the publishers address. It is common for magazines in the USA to have their writing staff in one location (or even two) while the actual printing is done in a completely different part of the country. Yes, they use computers to transmit the text via telephone. The larger circulation periodicals then give their magazine to a third organization which takes care of mailing, subscriptions, etc. In most other countries all operations are done by the same organization and only one address is involved.

COMPUTER SPECIALTY

In many cases a periodical will specialize in a specific brand of computer or operating system/language. If so, the name of the computer or operating system or programming language is shown. If the periodical has no proclaimed specialty then the word 'general' is shown.

SUBSCRIPTION RATES

The subscription rates shown for each periodical are for local subscribers unless noted. This is to serve as a guide only. Your actual cost will depend on the country in which you live and the cost of mailing to you. In some cases this is a significant increase. Although each periodical is different due to its' size and weight the following examples give an idea of the differences involved.

Creative Computing	USA	US\$ 24.97
	Canada	US\$ 29.97
	all others	US\$ 34.97
	air mail to Asia	US\$ 109.97
Byte	USA	US\$ 19.00
	Canada/Mexico	US\$ 21.00
	Europe	US\$ 43.00
	all others	US\$ 35.00
	air mail rates given on request!	

Because postal rates change, the charges for subscriptions will often change. Write directly to the periodical you are interested in to find out what your rate will be.

The following abbreviations have been used for currencies:

A\$	Australian Dollar
Bfr	Belgian Franc
BrSt	British Sterling
Cr\$	Cruzeiro (Brazil)
DM	Deutsch Mark (W. German Mark)
HK\$	Hong Kong Dollar
MN\$	Moneda Nacional (Mexico)
NeFr	Franc (Netherlands)
NZ\$	New Zealand Dollar
US\$	United States Dollar

SOFTWARE

Because software is such an important item to computer users, this information is included to indicate if the periodical serves as a source of software. In many cases this merely indicates that the magazine has numerous listings of programs. In the case of user group publications it means that a public domain library is available at a nominal charge. A few publications are in the form of cassette or diskette and directly provide the software with each issue.

COMMENTS

In most cases it has been possible to obtain a copy of the periodical and review it. A short description of the contents is given plus the number of pages in the sample issue. In some cases it was not possible to review the publication itself and the information has been

taken from secondary sources. For a few periodicals no sample copy had been received by the time of publication and these are left blank.

In some cases periodicals are available in microfiche from:

University Microfilms International	
300 N. Zeeb Road	or 30/32 Mortimer Street
Ann Arbor, Michigan 48106	London W1N 7RA
USA	England

In nearly all cases the microfiche form costs much less than the paper form. This is because postage is a very large part of the cost of a periodical. The microfiche form is available only as a yearly set. That is, in March or April you would receive a complete set of the last years issues of a periodical. There are no monthly mailings. Although the year delay will make some information outdated much valuable reference material is still useful. Before you order check to see if there is a USAID mission in your country. If so you can receive the microfiche sets at nearly half price! For up to date price information write to University Microfilms International.

PERIODICAL LISTING

'68' Micro Journal

5900 Cassandra Smith Road
Hixson, Tennessee 37343

Specialty: Apple Atari Commodore
US\$ 18.50/yr for 12 issues as of Apr. 82
Software available?: n

USA

This journal is written for microcomputers based on 6800, 6809 and 68000 CPU's such as Apple, Atari, Pet, AIM 65 and OSI and the TRS-80 Color Computer. Most of the articles place their emphasis on software with several assembly listings in each issue. The level of the articles is not for the novice. For example the article "Color User Notes" had an assembly listing of a keyboard scan routine for the TRS-80 Color Computer. Diskette copies of the listings can be purchased for US\$ 17.95 each. The Nov. 82 issue had 64 pages.

80 Micro

80 Pine Street
Peterborough, N. Hamp. 03458

Specialty: TRS-80
US\$ 25.00/yr for 12 issues as of Jan. 82
Software available?: y

USA

There is a noticeable tendency towards the Color Computer but this may be a passing trend. There are many short program listings some of which appear useful. If you don't like to copy listings to your computer see the cassette edition for the same programs under the name LOAD 80. The Nov. 82 issue had 518 pages! This is also available as yearly sets of microfiche from University Microfilm International for US\$ 18.10 per year.

99'er Home Computer Magazine

P.O. Box 5537
Eugene, Oregon 97405

Specialty: Texas Inst
US\$ 25.00/yr for 12 issues as of May 83
Software available?: n

USA

99'er Home Computer Magazine was previously known as just 99'er Magazine. It is advertised as the only magazine dedicated to the TI 99/4A home computer. Articles are mostly non-technical. Sample titles are "From Cut & Paste to Keystroke", "Gameware Buffet", "Multiplan Medium" and "The Drive for Diskettes". There is usually at least one short program listing in each issue. The May 83 issue had 70 pages.

A+

PO Box 2964
Boulder, CO 80322

Specialty: Apple
US\$ 15.49/yr for 12 issues as of Nov. 83
Software available?: n

USA

A.N.A.L.O.G.

PO Box 615
Holmes, Pennsylvania 19043

Specialty: Atari
US\$ 12.00/yr for 6 issues as of Dec. 82
Software available?: y

USA

This magazine is dedicated to Atari 400 and 800 computers. It is also available with the software on cassette (US\$36.00/year) or diskette (US\$60.00/year). Most of the articles and advertising concern games but a few business applications are included. There are numerous program listings in each issue. The undated issue #8 for 1982 had 96 pages.

Access

314 Dartmouth Street
Boston, MA 02116

Specialty: IBM PC Apple
US\$ 48/yr for 12 issues as of May 84
Software available?: n

USA

Access for IBM and Apple are two separate magazines but are similar in content. Access is written for the business user. Titles include "Insurance Loopholes You Should Plug", "Six Spelling Checkers at the Head of Their Class" and "Why You Should Master the Art of Macros". The May 84 issue had 12 pages.

Access

PO Box 12847
Research Triangle Park
North Carolina 27709

Specialty: general
US\$ 16.00/yr for ? issues as of Nov. 82
Software available?: n

USA

This is a journal for scientific applications of microcomputers including numerical analysis, math modelling, statistical analysis, computerized design, process simulation and report generation. Articles are done in a journal style and there is no advertising. Some articles include program listings. This journal is of interest to researchers using micros in their work and is recommended reading. The May/June issue had 44 pages.

Access: Microcomputers in Libraries

PO Box 764
 Oakridge, Oregon 97463

Specialty: general
 US\$ 11.00/yr for 4 issues as of May 82
 Software available?: n

USA

This publication contains articles about computer systems, data bases, software and some program listings for libraries.

AgComp Bulletin

Dept. Entomology
 Kansas State Univ.
 Manhattan, Kansas 66506

Specialty: general
 US\$ 10.00/yr for 4 issues as of July 82
 Software available?: n

USA

The AgComp Bulletin is aimed at the university agricultural staff member who works with microcomputers. It includes articles about the use of micros by agricultural researchers. Understandably there tends to be a slight bias towards entomology. There is no advertising. The July 82 issue had 3 articles in 75 pages.

AgriComp

Suite 201
 1001 E. Walnut
 Columbia, Missouri 65201

Specialty: general
 US\$ 15.00/yr for 6 issues as of Jan. 83
 Software available?: n

USA

AgriComp is advertised as the reference publication for farm computing and since there are no others, then it is! The emphasis is on computer applications for farmers. Sample titles from a recent issue were "Crop Sales Records and Analysis", "Grain Holding Costs" and "Evaluating Capital Assets". Each article concentrates on a spreadsheet application used by a farmer and some articles are written by farmers. This is one of the best farmer-oriented computer magazines to date and is highly recommended. The undated Vol. 1 No. 4 issue had 46 pages.

The Alternate Source

1806 Ada Street
Lansing, Michigan 48910

Specialty: TRS-80
US\$ 18.00/yr for 8 issues as of Oct. 82
Software available?: n

USA

A small 75 page monthly magazine which is concerned with programming the TRS-80 model I, II and III. Includes modification of system functions, software review and original program listings. Write for a free sample. Has published a complete set of statistical program listings in 6 issues. The Jan-Feb. 82 issue had 75 pages.

Antic

600 18th street
San Francisco, CA 94107

Specialty: Atari
US\$ 24.00/yr for 12 issues as of Sept 83
Software available?: N

USA

Antic is written for the home user of Atari computers. Although there are a few technical articles, most of the contents are non-technical in nature. A few sample titles include "Computers in Education", "Video Games visit Harvard Yard", "Object Code to String" and "Pattern Maker". There are usually two or three short program listings plus lots of advertising. The Sept. 83 issue had 110 pages.

Apple Orchard

910-A George Street
Santa Clara, California 95050

Specialty: Apple
US\$ 15.00/yr for 6 issues as of Jan. 82
Software available?: n

USA

This is a magazine publication of the International Apple Core which is an international federation of users groups. It has many well written articles for moderately experienced users. Typical articles in the Sept-Oct 82 issue were "Graphics With the Epson Printer", "Locksmith and the Inspector" and "VisiCalc Tips and Techniques". There are also numerous product announcements plus advertising. The Sept.-Oct. 82 issue had 112 pages.

Apple personlich

Vogel Verlag
Postbach 67 40, wurzburg 1

Specialty: Apple
DM /yr for issues as of
Software available?: ?

W. Germany

Apple: The Personal Computer Magazine

Apple Computer Inc. Specialty: Apple
20525 Mariani Ave. US\$ 9.00/yr for 3 issues as of Oct. 82
Cupertino, California 95014 Software available?: n
USA

A somewhat irregular publication of the Apple Computer Company. Generally it is a very nice magazine with lots of nice things to say about Apple products. It is the type of magazine given to prospective buyers. There is very little detail about software or hardware. The September 82 issue had 44 pages.

Appletree

Programmers Institute Specialty: Apple
PO Box 3191 US\$ 50.00/yr for ? issues as of Oct. 82
Chapel Hill, N. Carolina 27514 Software available?: y
USA

This is a cassette magazine of programs for the Apple. It was not possible to review a sample issue.

Asia Computer Weekly

Locked Bag Service No. 8 Specialty: general
Jurong Town Post Office US\$ 60.00/yr for 24 issues as of Feb. 83
Singapore 9161 Software available?: n
Singapore

The Asia Computer Weekly is available free to "computer personnel and to senior executives of organisations which own or use a computer system in Hong Kong, Singapore, Malaysia, Philippines, Tawiwan, Thailand, Indonesia and Macau." Its focus is toward business microcomputers and minis. Much of the content is about new hardware and applications. Sample titles are "Wang unveils two office machines", "No fanfare in KL for IBM's latest", and "Big move to market BBC micro throughout South-east Asia." The Feb. 25, 83 issue had 20 pages in a 40 x 23 cm format.

Asian Computer Monthly

Computer Publications Ltd. Specialty: general
 Seabird House - 7th Floor HK\$ 100.00/yr for 12 issues as of Jan. 83
 22-28 Wyndham St.; Central Software available?: n
 Hong Kong

This is an interesting magazine about the marketing and adoption of mini and microcomputers in Asia. There are numerous short notes and articles about new products, market changes, new systems and other industry news. Sample titles from a recent issue were "Thailand plans ambitious ID card system", "Asian governments to get micro buyer's guide" and "Computers vital in rural health care". The Jan 83 issue had 106 pages.

Australian Computer Journal

Associated Business Pub. Specialty: general
 104-3 Smail Street A\$ 20.00/yr for 4 issues as of Nov. 82
 Ultimo, N.S.W. 2007 Software available?: n
 Australia

The main focus of this scholarly journal is software for mainframe and mini computers but some information useful for micros is also included. Articles tend to treat the theory of software and are definitely oriented towards high level programmers. The Nov. 82 issue had 47 pages.

Basic Computing

3838 S. Warner St. Specialty: TRS-80
 Tacoma, WA 98409 US\$ 16.00/yr for 12 issues as of Sept. 82
 Software available?: ?

USA

The focus of this magazine is the family of TRS-80 computers. Articles are written for novices and experienced computer owners. Each issue has several short program listings. Topics are varied. The Nov. 82 issue had "Terminal and Modem Packages", "The INKEY\$ Bug", "Exploring VisiCalc" and "Variable Listing" as a few titles. The Nov. 82 issue had 124 Pages.

BASIC Society News

Drawer 345099
Dallas, Texas 75234

Specialty: IBM PC
US\$ 25.00/yr for 12 issues as of Nov. 82
Software available?: n

USA

The Basic Society is dedicated to IBM small systems computers such as System/34, Datamaster 5120, Series 1, Displaywriter and the PC. It is not affiliated with IBM. The emphasis is on software and applications for these systems. The most valuable parts are the advertisements for software. The less well known 5110 and 5120 models have little available software. The Sept. 82 issue had 12 pages.

Business Computer Digest

10076 Boca Entrada Boulevard
Boca Raton, Florida 33433

Specialty: general
US\$ 72.00/yr for 12 issues as of Jan. 83
Software available?: n

USA

Business Computing

PO Box 815
Tulsa, OK 74101

Specialty: IBM PC
US\$ 24.00/yr for 12 issues as of Apr. 84
Software available?:

USA

Business Computing is a monthly magazine directed towards the business user of an IBM PC and compatibles. The contents consist of reviews, new technology and business orientated articles. Sample titles include: "Turning a Profit with Free Software", "Compatibility - What it is, Who's got it", "The Database Primer Part III", and "Maintenance - the Newest PC Industry". The April 84 issue had 104 pages.

Business Computing

119 Russell Street
Littleton, MA 01460

Specialty: IBM PC
US\$ 18.00/yr for 6 issues as of Apr. 83
Software available?: n

USA

Reference is a bi-monthly magazine directed towards the business user of an IBM PC. The contents deal primarily with software uses and reviews with about one-fourth of the articles being dedicated to hardware. The articles are very non-technical, even in the software reviews. Titles from the first two issues included "Managing the Stress of Computerization", "Spelling Checkers for the IBM Personal Computer", "Database Management"

and "The Spreadsheet Column". The March/April issue had 68 pages.

Business Systems Product Update

PrimeStar Research Specialty: general
 701 E. Irving Park Road US\$ 36.00/yr for 12 issues as of May 83
 Roselle, Illinois 60172 Software available?: n
 USA

Product Update is a monthly magazine written for users of small business microcomputers. The format consists of a series of concise summaries of new products or changes in existing ones. Each summary carries a title, a 10-100 line description or summary, operating system and vendor address. Both software and hardware items are covered. The May 83 issue described 43 hardware items, 99 software packages, and 3 other items. Twenty two agricultural packages were described! Most software packages are for business applications. There is no advertising. The May 83 issue had 35 pages.

Business Systems Update

PrimeStar Research Specialty: general
 701 E. Irving Park Road US\$ 49.00/yr for 12 issues as of May 83
 Roselle, Illinois 60172 Software available?: n
 USA

Business Systems Update is a collection of abstracts from 40 periodicals which concern business users of microcomputers. Although hardware reviews are included the bulk of the abstracts concern business software. A total of 184 abstracts were included in the April 83 issue. Each abstract includes the title, a 10-50 line summary and a citation. There is no advertising. The April 83 issue had 46 pages.

Byte

Byte Subscriber Service Specialty: general
 PO Box 328 US\$ 19.00/yr for 12 issues as of Jan. 82
 Hancock, New Hampshire 03449 Software available?: n
 USA

This is the most famous and widely read microcomputer journal. It covers all types of microcomputers and software. Lots of information and advertising in each issue make this magazine useful for product notices although each issue is pretty thick. The Sept. 82 issue had 611 pages! It is also available from University Microfilms International for US\$ 21.90 per year.

CAD/CAM Technology

Society of Manuf. Engineers
 One SME Drive - Box 930
 Dearborn, Michigan 48128
 USA

Specialty: general
 US\$ 24.00/yr for 4 issues as of Jan. 82
 Software available?: ?

CAL

60 Ridgeway Plaza, Suite 3
 Stamford, CT 06905

Specialty: general
 US\$ 50.00/yr for 6 issues as of June 83
 Software available?: Y

USA

CAL stands for Computer Applications in the Laboratory. It deals with applications of microcomputers in analytical laboratories. Sample titles include "Polynomial Regression/Interpolation", "Manipulation of Chromatographic Data Using Microcomputer Graphics", "On-line Quantitative TLC Evaluation of Large Amounts of Samples of Plant Origin", and "An Algorithm for the Encoding of Peaks in Digitized Chromatographic Data". It is written in a journal style.

Calico Journal

229 KMB
 Brigham Young Univ.
 Provo, Utah 84602
 USA

Specialty: general
 US\$ 25.00/yr for 4 issues as of Sept 83
 Software available?:

CALICO stands for Computer Assisted Learning and Instruction Consortium. It is directed towards university and adult level educators and researchers in education. Sample titles include "Using Computers to Teach Foreign Languages to Adults", "Computer - Assisted Evaluation of Student Papers", and "Single Frame Video for Language Instruction". The Sept. 83 issue had 48 pages.

Cider Press

San Francisco Apple Core Inc. Specialty: Apple
 1515 Sloat Blvd., Suite 2 US\$ /yr for 6 issues as of Oct 82
 San Francisco, CA 94132 Software available?: y
 USA

Cider Press is put out by the Sanfrancisco Apple Core, a club of owners and users of Apple II and Apple /// computers. The magazine publishes articles dealing with Apple computers and their associated hardware and software. Some sample titles include "Basic", "Apple Writes Extended, A Review", and "Speeding Up Your Apple ///". The Sep./Oct. issue had 46 pages.

Classroom Computer News

341 Mt. Auburn St. Specialty: general
 Watertown, MA 02172 US\$ 19.95/yr for 8 issues as of Mar. 83
 Software available?: n

USA

Classroom Computer News is subtitled as the magazine for teachers and parents although most of the material is obviously for teachers. Articles are very non-technical and deal mostly with how computers and software are used rather than how a program works. Sample titles include "There's a Green Glob in Your Classroom!", "Pixels and Pendulums", "How to Select Software you can Trust" and "The Problem Solving Revolution". The March 83 issue had 102 pages. It is also available on microfiche from University microfilms International.

CLOAD

PO Box 1267 Specialty: TRS-80 I TRS-80 III
 Goleta, California 93116 US\$ 50.00/yr for 12 issues as of Nov. 82
 Software available?: y

USA

A monthly cassette of programs for TRS-80 I and III computers with level II BASIC and 16K memory. Each cassette comes with some printed announcements and bug corrections. Single copies sell for US\$ 4.50. Recently a disk version of CLOAD has been announced which costs US\$ 95 per year.

Cococassette

T & D Software
 PO Box 256-C
 Holland, Michigan 49423
 USA

Specialty: Color Comp
 US\$ 55.00/yr for 12 issues as of Nov. 82
 Software available?: y

This is another cassette 'magazine' for the TRS-80 Color Computer featuring games, education and home finance programs. All programs are for the extended basic color computer.

Collegiate Microcomputer

Dr. Brian Winkle
 Dept. Math., Rose Hulman Inst.
 Terre Haute, IN 47803
 USA

Specialty: general
 US\$ 28.00/yr for 4 issues as of Nov. 83
 Software available?: n

Collegiate Microcomputer is a quarterly magazine devoted to all areas of microcomputers in the college or university environment. Contents consist of ideas, papers, opinions and announcements. Sample titles include "A Clustering Microcomputer System in a Continuing Education Office", "Microcomputer Graphics and Calculus", "Statistical Calculations with Microcomputers" and "Computer Generated Graphic Tutorials". This can also be obtained through University Microfilms International. The winter 1983 issue had 96 pages.

Color Computer Magazine

PO Box 468
 Hasbrouch Heights, NJ 07604
 USA

Specialty: Color Comp TDP-100
 US\$ 24.00/yr for 12 issues as of March 83
 Software available?: n

This is a new magazine for Color Computer and TDP-100 users though Dragon 32 users could also benefit from the program listings. It is written for experienced users and has several short listings of BASIC programs and assembly utilities. Some titles from the first issue were "Stash a Directory", "Your Basic DBM", "Tick Talk", "Custom Color", and "A Guide to Word Processors". The March 83 issue had 64 pages.

Color Computer News

REMarkable Software Specialty: Color Comp
 PO Box 1192 US\$ 21.00/yr for 12 issues as of Nov. 82
 Muskegon, Michigan 49443 Software available?: n
 USA

Color computer News is written for users of the TRS-80 Color Computer. Articles range from novice programming to hardware modifications. Sample titles include "Poor Man's Floppy", "Numeric Data Entry Pad", "Disk Utility" and "Hangman". There are also several short program listings in each issue plus much advertising. The May 83 issue had 142 pages.

Commodore

The Microcomputer Magazine Specialty: Commodore
 487 Devon Park Drive US\$ 15.00/yr for 6 issues as of Nov. 82
 Wayne, Pennsylvania 19087 Software available?: n
 USA

Previously known as Interface this is published by Commodore Business Machines. In spite of being published by a manufacturer it is surprisingly well written. There are articles for the novice, the experienced user and the business user. Some articles include software listings but most review software, review hardware, answer questions, describe applications or just announce new products. There is even advertising for software and hardware. The Oct.-Nov. 82 issue had 100 pages.

COMPendium

Epicurious Publishing Co. Specialty: general
 PO Box 129 US\$ 18.00/yr for 12 issues as of Oct. 82
 Lincolndale, Yew York 10540 Software available?: n
 USA

This is an abstracting of about 20 major microcomputer periodicals. It also includes reviews of directories and software covered in these periodicals.

CompuMundo

Computerworld do Mexico Specialty: general
 Administracion de Correos No.7 M.N. 5000/yr for 12 issues as of Aug. 84
 06700 Software available?: y
 Mexico, D.F.

CompuMundo, written in spanish is addressed to the business user of micro and mini computers. The level a fairly technical covering subjects such as "Sistemas Expertos", "Intergracion de Recursos Humanos Informaticos", "El Control de la Investigacion" and "Control Presupuestal Automatizado". The Aug. 84 issue had 66 pages.

Compute!

PO Box 914 Specialty: Apple Atari Commodore
 Farmingdale, NY 11737 US\$ 20.00/yr for 12 issues as of Mar. 82
 Software available?: n

USA

Compute! is dedicated to home, educational and recreational computing on Atari, Apple, Commodore, Color Computer, Sinclair and Texas Instruments computers. Most of the articles are for the experienced programmer with some articles for the novice and expert. Sample titles include "Atari Master Disk Directory", "VIC Scaling Bar Graphs", "Apple Sounds--From Beeps to Music" and "Merging BASIC programs from Commodore Disk". Regular sections include Telecommunications, Computer and Society and Questions Beginners Ask. The Oct. 83 issue had 344 pages.

Compute!'s Gazette

P.O. Box 5406 Specialty: Commodore
 Greensboro, NC 27403 US\$ 20.00/yr for 12 issues as of July 83
 Software available?: n

USA

Compute!'s Gazette specializes in the Commodore 64 and Vic 20 microcomputers. It is written for the home and hobby computer user and has much for a beginning user. Sample titles from the first issue were "Does Your Computer Need a Cassette Recorder?", "Word Hunt: A puzzle game", "Machine Language for Beginners" and "Enlivening Programs with Sound". The first edition had about 12 pages of short game type program listings and a total of 128 pages

Computer Answers

VNU Business Publication, B.V. Specialty: general
 65 Oxford St. BrSt. ?/yr for 6 issues as of Feb. 83
 London W1a 2HG Software available?: n
 G. Britain

Computer Answers is a new magazine whose focus is explaining aspects of microcomputers to experienced users. Although there are sections for the new user, the majority of the articles are written for persons who already have some working knowledge of the subject. The sections or types of articles include equipment upgrades, programming, operating systems, applications software and equipment purchasing. The technical level of the articles seems good and is written in an understandable manner. The Jan./Feb. 83 issue had 128 pages.

Computer Personlich

Markt & Technik

Hans-Pinsel Strasse 2

8013 Haar bei Munchen

W. Germany

Specialty: general

US\$ 78.00/yr for 26 issues as of July 83

Software available?: n

Computer Persönlich is a German language magazine directed towards users of small home and business computers. Sample titles are "Wordstar-Stern unter den Texteditoren", "Was kann das neue CPM Plus?", "Zwei neue Plotter mit Farbstiftwechsel in test", and "oric-1: Der Geheimtip aus England". The July 26 issue also carried listings of short hobby programs for the VC-20, Apple II, TRS-80 I, ZX-81 and HP-85. The July 26 issue had 159 pages.

Computer Retail News

111 East Shore Road

Manhasset, New York 11030

Specialty: general

US\$ 15.00/yr for 12 issues as of Oct. 82

Software available?: n

USA

Free subscriptions are offered to "qualified management personnel at companies involved in the retailing of computers, software and accessories.". It is written for microcomputer retailers in the USA. Articles have news about personnel changes in companies, policy changes in software and retail chains, announcements of new equipment and advertising. Although useful for retailers it does not have much for the scientific user. The Oct. 82 issue had 68 pages.

Computer Shopper

PO Box F 380

Titusville, Florida 32780

Specialty: general

US\$ 10.00/yr for 12 issues as of Oct. 82

Software available?: n

USA

It specializes in advertising and notices of individuals who want to sell or trade computer equipment. There is also much commercial advertising. The individual notices are classified by computer type. There are also a few reviews of software packages plus a handy list of users groups and operating hints for various microcomputers. There is slightly more emphasis on hardware than software. If you need equipment and have a person in the USA to handle the purchase this is a useful publication. The Nov. 82 issue had 116 pages.

Computer Systems News

111 East Shore Road
 Manhasset, New York 11030 Specialty: general
 US\$ 15.00/yr for 26 issues as of Nov. 82
 Software available?: n

USA

This publication is free to "qualified management and professional personnel at companies involved in the computer systems industry.". The emphasis is on news of happenings among manufacturers of microcomputers. There is not much of interest for the average user except a few items about new product releases. The Nov. 8, 82 issue had 72 pages.

Computer Trader

1704 Sam Drive
 Birmingham, Alabama 35235 Specialty: general
 US\$ 10.00/yr for 12 issues as of Oct. 82
 Software available?: n

USA

This monthly magazine specializes in advertising by businesses and individuals. There are also short articles written by readers such as "Ultra Micros", "Micros in Education", "Apple Writer II" and "The Computer Junkie". There are also notes about ham radio/computer users. Although most of the advertising space is by businesses there are perhaps 6-8 pages of individual ads of items for sale. The March 83 issue had 63 pages.

 US\$ 16.50/yr for 9 issues as of Mar. 82
 Software available?: n

Computing Today

513 London Road
 Thornton Heath
 Surrey CR4 6AR
 G. Britain

Specialty: general
 Br St 12.10/yr for 12 issues as of Dec. 82
 Software available?: n

This is a general coverage magazine written for the microcomputer hobbyist. Articles tend to be short and are written for the user with moderate experience. Recent issues had articles entitled "The Art of Data Storage", "Tape Indexer", "BBC Programming" and "Atom FORTH Reviewed". There are several new product reviews in each issue plus some construction projects and software news. The emphasis is on very small personal computers, not business machines. This is a very useful magazine for very small British computer users. The Dec. 82 issue had 114 pages.

Computronics News Magazine

Computronics Specialty: TRS-80
 50 N. Pasack Road US\$ 24.00/yr for 12 issues as of Aug 82
 Spring Valley, New York 10977 Software available?: n
 USA

Articles are about software review, hardware review, programming tips and a few program listings. The program tips tend to be well written and researched. There is quite a bit of advertising with Computronics having a lot but not all of it. Overall it is a rather well done magazine and is among the better ones published by a retailer. The Dec. 82 issue had 68 pages.

CP/M Review

2711 76th Ave. S.E. Specialty: CP/M
 Mercer Island, WA 98040 US\$ 18.00/yr for 6 issues as of Jan. 84
 Software available?: n

USA

CP/M Review is directed towards the experienced CP/M user. The intermediate technical level is a bit too complex for the office worker but quite acceptable for a home or hobby user. Sample titles from a recent issue were "dBaseII User's Forum", "A CP/M Menu Program", "Out on a 5 1/4" limb" and "Microshell and Microtools". Normally there are no program listings but one article included an assembly listing of a menu program. The Nov/Dec 83 issue had 92 pages.

Creative Computing

PO Box 5214 Specialty: general
 Boulder, Colorado 80321 US\$ 24.97/yr for 12 issues as of Sept. 82
 Software available?: n

USA

This tends to focus on software and applications of microcomputers. Normally it has evaluations of new software, equipment, programming hints and advertising. The Sept. 82 issue had 417 pages. It is also available as yearly microfiche sets from University Microfilms International for US\$ 7.00 per year.

DAInamic

Bruno Van Rompaey
 Bovenbosstraat 4
 3044 Haasrode
 Belgium

Specialty: DAI
 Bfr 750/yr for 6 issues as of Jan. 82
 Software available?: y

The newsletter is in English, French, Flemish and sometimes German! There are many program listings plus programming tips and a few circuits for those who like to construct electronic gadgets. Although much is written in Flemish the program listings are easy to understand. The DAI library is not large but there are reasonable descriptions of each cassette. There is also nice computer artwork on most of the pages. The Jan-Feb. 82 issue had 66 pages.

Data Based Advisor

Suite 105
 1975 5th Avenue
 San Diego, CA 92101
 USA

Specialty: dBASE II
 US\$ 35.00/yr for 12 issues as of July 83
 Software available?: n

The Data Based Advisor is a new magazine for the user of dBASE II. Being an application oriented publication it is fairly non-technical. Sample titles from the first issue include "Running CP/M from dBASE II", "Ashton Tate is New Friday", "Reverse Reports" and "Identification and Configuration". The undated first issue had 46 pages.

Data Communications

Mc-Graw Hill Publications
 1221 Avenue of the Americas
 New York, New York 10020
 USA

Specialty: general
 US\$ 24.00/yr for 12 issues as of Jan. 82
 Software available?: ?

Also available on microfiche from University Microfilms International.

Data News & Micro Mundo

Computerworld do Brasil Specialty: general
 Rua Alcindo Guanabara 25/10 Cr\$ 4400/yr for 52 issues as of Nov. 82
 CEP 20.031 - RJ Software available?: n
 Brasil

Although the focus is on minicomputers there are a few items about micros in this Portuguese publication of Data News. The 16 Nov. 82 issue had 32 pages. Of more interest is the monthly supplement called Micromundo. It is included in the subscription with Data News and is dedicated to microcomputers in Brasil. Similar to Data News it also tends to concentrate on industry news and new product announcements rather than software. The Nov. 82 edition had 28 pages.

Database

Online Inc. Specialty: general
 11 Tannery Lane US\$ 56.00/yr for 4 issues as of July 83
 Weston, CT 06883 Software available?: n
 USA

Database is written for the user of on-line databases, especially in the US. Sample titles include "Electronic Legislative Search System", "How to Lose a Nation's Literature", "Database Coverage of Australian Research" and "Business on BRS-Focus on Predicasts". There is also much advertising for online databases. The Aug. 83 issue had 88 pages. It is also available on microfiche from Univeristy Microfilms International.

Datacast

Wireless Digital Specialty: general

Decision Informatique

Groupe Tests
 5, place de Colonel Fabien
 75491 Paris Cedex 10
 France

Specialty: general
 FF 195.00/yr for 24 issues as of Feb. 83
 Software available?: n

Since Decision Informatique is published twice each month there is a bit more news of new products than most monthly magazines. It is written principally for non data processing professionals to help them choose and use their microcomputer.

Desktop Computing

PO Box 917
 Farmingdale, New York 11737
 USA

Specialty: general
 US\$ 25.00/yr for 12 issues as of Mar. 82
 Software available?: n

The business manager who uses microcomputers is the reader of this magazine. There are no program listings and the articles are written for a non-programmer. Some titles of a recent issue were "The Politics of Mailing list Management", "Say Hello to Telecommunications", "Software Maintenance: Protect Your Investment" and "A Graphic Display". There are also product reviews and advertising. The Dec. 82 issue had 98 pages.

Dr. Dobb's Journal

1263 El Camino Real
 Menlo Park, California 94025
 Specialty: general
 US\$ 25.00/yr for 12 issues as of Sept. 82
 Software available?: n

USA

This name is shortened from the original Dr., Dobb's Journal of Computer Calisthenics and Orthodontia. It tends to cover some of the less popular aspects of microcomputing. For example recent issues have covered FORTH, algorithms, networking, Tiny BASIC, Runic compiler and many others. The articles are written for the experienced programmer. The Sept. 82 issue had 78 pages. Also available as yearly microfiche sets from University Microfilms International for US\$ 7.00 per year.

Dragon User

Oakfield House
 Perrymount Road
 Haywards Heath, Sussex RH16 3DH
 Specialty: Dragon
 BrSt 8.00/yr for 12 issues as of Sept83
 Software available?: n

G. Britain

Dragon user is written for the home user of the Dragon 32 computer. The articles concern game programming and new uses for the Dragon. Typical titles include "Wake up your Dragon - using animation", "Don't be afraid of disassembly" and "Add a new dimension to your Dragon". There are typically 3-4 short program listings plus much advertising for software and hardware. The Sept. 83 issue had 50 pages.

Easy Home Computer

Pumpkin Press
 Suite 6204; 350 5th Ave.
 New York, NY 10118
 Specialty: general
 US\$ 22.50/yr for 6 issues as of July 83
 Software available?: n

USA

Easy Home Computer is dedicated to home uses of microcomputers. The articles explain technical subjects in a well written non-technical way. Sample titles in the first edition were "Getting Graphic", "Class Acts", "Peripheral Visions" and "Home Sweet Home". This could turn out to be a useful magazine for new computer users who need clear and simple explanations of computers. The June issue had 82 pages.

Educational Computer

PO Box 535
 Cupertino, California 95015 Specialty: general
 US\$ 12.00/yr for 6 issues as of Mar. 82
 Software available?: n

USA

Written for teachers in all grade levels, Educational Computer has a well written selection of articles. Sample articles in the Nov.-Dec. 82 issue were "Games as Teaching Tools", "Tele/Conferencing", "Microcomputer Laboratory for Florida Educators" and "An apple PILOT Primer". There are also numerous software reviews plus notes of new products. The 62 pages of the Nov.-Dec. 82 issue included advertising.

Educational Technology

140 Sylvan Avenue

Netherlands

Specialty: general
Ne fr 30.00/yr for 12 issues as of July 81
Software available?: y

This is the publication of the Belgian Hobby Computer Club and is written in Flemish. There are numerous short articles on software evaluation, hardware, special interest groups and programming tips plus much advertising. There are many special interest groups for specific computers. The July 81 issue had 50 pages.

Hebdogiciel

27 rue du Gal-Foy
75008 Paris

Specialty: general
FF /yr for 52 issues as of Sep. 84
Software available?: y

France

Hebdogiciel is primarily for the home and game micro user. It specializes in short program listings for most of the very small micros. The 14 Sept. 84 issue even carried a listing for the HP 41 programmable calculator! Programs for a total of 16 micros were in the 14 Sept. 84 issue. Also included in the same issue were articles on a few new products and a couple of programs. Most of the programs listed can also be purchased through the magazine. The 14 Sept. 84 issue had 20 pages in a 30 x 43 cm format.

Home Computing Weekly

Argus Specialist Publishing
145 Charing Cross Rd.
London WC2H 0EE

Specialty: general
BrSt. 19.76/yr for 52 issues as of Aug. 83
Software available?: n

G. Britian

Home Computing Weekly is written for the small home computer user. It carries software and hardware reviews plus small news items of interest to hobby computer users. The articles are usually one page affairs and the software reviews are placed in cute little frames of 4-5 per page. There is not a lot of detail in the reviews! The 26 July 83 issue had 48 pages.

Homecomputer

Gartenstrasse 47
3440 Eschwege

Specialty: general
DM 55.00/yr for 12 issues as of July 83
Software available?: y

W. Germany

Homecomputer is written for the home computer user and programmer. Many of the pages have game program listings for small home computers such as ZX-81, VC-20, Apple, PET, Texas 99/4 and the Spectrum. Sample program titles are "Kartenspiel 31", "Steckerspiel", "Mampfmann", "Oil-panic" and "Hausnummern". Most of the programs are relatively short and simple but this is a cheap way to build up your collection of game software. The July 83 issue had 13 program listings in 66 pages.

HOT CoCo

Farmingdale, NY 11737

Specialty: Color Comp TDP-100
US\$ 24.97/yr for 12 issues as of Aug. 83
Software available?: N

USA

HOT CoCo is written for the hobby user of a TRS Color Computer or TDP-100 computer. Most of the articles deal with programming and a few program listings are included. Sample titles are "Personal Property Inventory", "Displaying Moving Graphics", "CoCo List Control" and "Photographing a TV Screen". There are also software and hardware reviews. The August 83 issue had 146 pages.

I.B. Magazine

1306 Petroleum Tower
Shreveport, Louisiana 71101

Specialty: IBM PC
US\$ 19.97/yr for ? issues as of Oct. 82
Software available?: y

USA

This is a diskette based magazine. The cost is US\$ 10.00 for each diskette and permits the user to copy the diskette and return it for another diskette. The first diskette costs US\$ 15.00. Although both sides of the diskette are used it is recorded in single sided double density format. The articles are recorded on one side and the demonstrations and programs are on the other side of the diskette. All articles and programs are for 48K RAM. Sometimes an article will ask the reader to answer questions or supply information. This is then recorded on the diskette which is returned to the publisher to give reader feedback. This is supposedly the reason for the name; Interactive Bi-directional Magazine on a Diskette.

IBM Personal Computer Journal

CRC Publishing
10057 Commerce Avenue
Tujunga, California 91042
USA

Specialty: IBM PC

Framingham, Mass. 01701

Specialty: general
US\$ 25.00/yr for 52 issues as of Mar. 82
Software available?: n

USA

As a weekly publication Infoworld is dedicated to the serious microcomputer user. There are regular software reviews plus news of new developments in the microcomputer industry. Normally the first announcements of new products are in Infoworld. The large format (28 cm x 39 cm) also permits better page layouts. The July 82 issue had 60 pages. Also available as yearly microfiche sets from University Microfilms International.

Journal of Microcomputer Applications

Academic Press

24-28 Oval Road

London NW1 7DX

Specialty: general

BrSt 30.00/yr for 4 issues as of Jan 83

Software available?: n

G. Britain

This is one of the most scholarly journals published for microcomputer users. Unfortunately most of the "micros" discussed fall within the minicomputer class and little mention is made of common microcomputers. Sample titles are "Using language C for real-time control of microprocessor systems with small memory", "Computerized mapping of acute myocardial infarction" and "The design and applications of a dual port memory for microprocessor systems". The Jan. 82 issue had 91 pages.

Journal of Pascal and ADA

PO Box 384

Orem, Utah 84057

Specialty: Pascal Ada

US\$ 14.00/yr for 6 issues as of Aug. 82

Software available?: y

USA

The contents of this journal are obviously aimed at university level programmers. The first issue featured a high resolution graphics program listing, software design, statistical analysis and the theory of probability distributions. A unique service offers readers free copies of programs listed or described by telephoning a bulletin board service and receiving the programs via modem. It would be a very useful journal for university level Pascal and ADA users. The July-Aug. issue had 39 pages.

LAMP

Specialty: general

DM 47.00/yr for 12 issues as of Dec. 82

Software available?: n

This monthly news magazine specializes in developments in microcomputers for German-speaking Europe. Although some articles concern personnel news most of the pages contain notices of new product releases, hardware reviews and general subjects. The 11 Nov. 82 issue carried a review of the differences between 8, 16 and 32 bit computers, a review of Logo, an evaluation of the Osborne I and some market predictions. Perhaps the reviews of new equipment is most useful for persons outside of Europe. How else can you find out about the PDC Contrast (a portable computer that doubles as a color TV)? The 12 Dec. 82 issue carried a very useful summary of micros currently sold in Germany. The 12 Dec. 82 issue had 50 pages in a 26 X 37 cm format.

 Italy

Popular Computing

PO Box 307 Specialty: general
 Martinsville, NJ 08836 US\$ 15.00/yr for 12 issues as of Mar. 82
 Software available?: n

USA

The selection of subject matter included in Popular Computing tends to be directed toward the professional/business microcomputer user. There are few program listings. Some titles of articles in the Sept. 82 issue were "The Art of Flowcharting", "Program Generators", "Executive Briefing System" and "The Apple III". There are the usual product reviews and advertising. The Sept. 82 issue had 160 pages.

Popular Computing Weekly

Hobhouse Court Specialty: general
 19 Whitcomb Street BrSt 19.95/yr for 52 issues as of Aug. 83
 London WC2 7HF Software available?: n
 G. Britian

Popular Computing Weekly is a weekly magazine for small home computer users. The articles are for hobby programmers and have titles such as "Bill Hoskins reviews the Microdrive", "Sorting a Routine", "A set of values" and "3-D Plot". There is also classified and retail advertising. A total of seven very short program listings were in the 48 pages of the 28 July 83 issue.

Portable 100

PO Box 468 Specialty: TRS-80 100
 Hasbrouck Heights, NJ 07604 US\$ 24.97/yr for 12 issues as of Sept 83
 Software available?: n

USA

The Portable 100 is dedicated to users of the Radio Shack model 100 computer. Articles are varied but most are non-technical. Sample titles from the first issue include "Format your words with this Text Aide", "Build your Null Modem" and "Track your Fortune with Market-100". The first issue dated Sept. 83 had 64 pages.

The Portable Companion

Osborne Computer Corp. Specialty: Osborne
 26538 Danti Court US\$ 25.00/yr for 6 issues as of Nov. 84
 Hayward, California 94545 Software available?: n
 USA

This is a manufacturers magazine with a bit more interesting content than most. There are the usual advice articles for the new user plus information on modifications. The advertising is useful as is the user group information. The Oct.-Nov. 82 issue had 95 pages.

Portable Computer

500 Howard Street Specialty: general
 San Francisco, Calif. 94105 US\$ 15.97/yr for 6 issues as of Feb. 83
 Software available?: n

USA

The first issue of Portable Companion was in February 1983. As the title states it is concerned with portable computers. The first issue classified 45 computers as hand held, briefcase-size or suitcase size. The articles are written for new users and have titles such as "First Encounters", "Computer Shock", "The Ultimate Sales Tool" and "The New Helping Hand". There are also regular sections on new hardware and software. The Feb. 83 issue had 100 pages.

Practical Computing

Oakfield House Specialty: general
 Perrymouth Road Br St 12.00/yr for 12 issues as of Feb. 83
 Haywards Heath Software available?: n
 G. Britain RH16 3DH

The articles of this popular British magazine are written for home computer and small business computer users. There are regular articles which review new microcomputers and equipment plus tips on how to program simple applications. There are short sections for several small computers which have a listing of some useful application programs. Sample titles are "Linear Regression - a Statistical Tool", "An Introduction to Word Processing" and "Toshiba T-100 Exclusive Test". The Feb. 83 issue had 202 pages.

This is dedicated to the small group of computers using the 6809 CPU. It covers items of interest to the novice and experienced programmer. Sample titles from a recent issue were "Lets Look at Memory", "Patching EDTASM+ To Run on Disk", "Moving Graphics" and "Graphics Word Processing". There are numerous program listings and advertising. Although many of the articles deal with game applications there are several business or non-technical applications described in each issue. The Dec. 82 issue had 178 pages.

REMark

Heath Users Group
Hilltop Road
St. Joseph, Missouri 49085
USA

Specialty: Heath Zenith
US\$ 18.00/yr for 12 issues as of Oct. 81
Software available?: y

This is the publication of HUG (Heath Users' Group). It contains software and hardware reviews, listings of short programs, bug corrections and advertising. The Jan. 83 issue contained listings of software, users groups and vendors of Heath accessories. HUG also maintains a library of software but most diskettes cost over US\$ 20.00. The Oct. 82 issue had 40 pages.

La Revue de l'Utilisateur de l'IBM-PC

2 rue d'Amsterdam
75009 Paris

Specialty: IBM-PC
FF 190/yr for 11 issues as of Nov. 84
Software available?: n

France

La Revue de l'Utilisateur de l'IBM-PC is obviously dedicated to users of IBM-PC and compatible users. It is just starting and there are some rather obvious blank spaces where the editors did not have enough material to fill in. Sample titles from a recent issue include "Peek et Poke, comment acceder aux fonctions systeme et materiel", "Mettez de l'ordre dans votre disque dur", and "Logo: un langage our les adultes aussi". The November 84 issue had 64 pages.

Sextant

716 E Street, SE
Washington, D.C. 20003

Specialty: Heath Zenith
US\$ 9.97/yr for 4 issues as of Sept. 82
Software available?: n

USA

This magazine is written for the Heath/Zenith user who is an experienced programmer and occassionally likes to "adjust" his hardware. Regular articles include items such as "IMAGE: A Word Processor", "A Survey of Disk Controller Alternatives" and "Interrupt Programming under HDOS". The articles are well written but are fairly technical and not for the novice. The Winter 83 issue had 92 pages.

Sinclair Programs

ECC Publications
30-31 Islington Green
London N1 8BJ
G. Britian

Specialty: Sinclair
BrSt 13.20/yr for 12 issues as of Aug. 83
Software available?: y

Sinclair Programs is dedicated to printing listings of short programs for the ZX-80, ZX-81 and Spectrum. Though most are games there were a few of scientific interest in the July 83 issue such as "Simultaneous Equations", "Lissajous", and "Formulae". This is definitely a cheap way to build up a library of software for Sinclair computers. The July 83 issue had 40 programs in 58 pages.

Specialty: general

Br St 15.00/yr for 6 issues as of Jan. 83

Software available?: n

The programmer searching for program listings need look no further. This is a bimonthly index to magazine articles and books that have listings of software. Each entry is classified by name and type of software. A short 1 to 3 line description of the program functions is included plus the magazine or book source and the computer type. For the person who needs software but is hampered by the need to mail cassettes or diskettes (to avoid import duty) this is an essential reference. The Nov. 82 issue listed 399 programs in 32 pages.

Soft & Micro

43 rue St. Charles

75015 Paris

Specialty: general

FF 198/yr for 11 issues as of Dec. 84

Software available?: y

France

Soft & Micro is primarily dedicated to microcomputer software although a few hardware reviews seem to creep in. It also has a section of program listings for smaller micros such as Apple, Sinclair Oric, etc. Sample titles from a recent issue include "Mac Manager", "Chartstar", "Philips VG 5000: un futur best seller" and "l'Aide a la Decision". The December 84 issue had 188 pages.

Softalk

11021 Magnolia Boulevard Specialty: Apple
 North Hollywood, Calif. 91601 free/yr for ? issues as of Oct. 82
 Software available?: n

USA

This is advertised as a free magazine to all Apple owners and includes programming advice and software reviews.

Softalk for the IBM Personal Computer

Box 60 Specialty: IBM PC
 North Hollywood, Calif. 91603 US\$ 24.00/yr for 12 issues as of Nov. 82
 Software available?: n

USA

If you are a new owner of an IBM PC you can receive a free trial subscription by sending your address and your PC serial number. This magazine is not affiliated with IBM. The articles have pretty artwork but are aimed at the non-technical user. There are some articles of unique applications of the PC plus how-to articles useful for someone starting out. The Oct. 82 issue had 60 pages.

Softdisk

3811 St. Vincent Specialty: Apple
 Shreveport. LA 71108 US\$ 60.00/yr for 12 issues as of June 83
 Software available?: Y

USA

Softdisk is a diskette based publication. The first issue costs US\$10 and each month that diskette is returned with US\$5 to receive the next edition. This could be a problem for subscribers outside the US.

Softside

PO Box 68 Specialty: Atari Apple TRS-80
 Milford, New Hampshire 03055 US\$ 30.00/yr for 12 issues as of Mar. 82
 Software available?: n

USA

The primary audience for Softside seems to be game playing owners of Atari, Apple and TRS-80 computers. Each issue has documentation and listings of game programs for each computer. The Dec. 81 issue also gave two game programs (Microtext 1.0 and Titan) in three listings for each of the three computers! This would be a useful subscription to sneak in your library order list. It is also available in Microfiche from University Microfilms International. The Dec. 81 issue had 96 pages.

Software & Microsystems

Inst. of Electrical Engineers Specialty: general
 Station House, Nightingale Rd. BrSt. 27.00/yr for 6 issues as of Feb. 82
 Hitchin, Herts SG5 1RJ Software available?: n
 G. Britain

Software & Microsystems is dedicated to designers and users of high level microcomputer software such as operating systems and languages. The articles are well researched and written. Sample titles are "Host-satellite Software Tools for Microcomputer Systems" and "EMU: a Multiprocessor Software Debugging Tool". There are also applications reports, book reviews and news of the IEE. This magazine is not for a novice computer user. The Feb. 82 issue had 60 pages.

The Software Journal

427 Poiner Bldg Specialty: general
 600 First Ave US\$ 15.00/yr for 12 issues as of Apr. 84
 Seattle, WA 98104 Software available?: n
 USA

The Software Journal is a monthly newspaper format publication that covers news of the industry and marketplace. It is written primarily for persons involved with the marketing of microcomputer software. Articles cover Business, communications, Education and Entertainment. Sample titles of articles include "CPA Makes billboards Top 10", "Micropro and IBM Japan announce agreement", "Early Childhood Software " and "MS-DOS Software on Apple II". The April 84 issue had 32 pages in a 28 x 44 cm newspaper format.

Software News

Sentry Database Publishing Specialty: general

This is a new magazine for TI-99 users published in German. No further information is available at this time.

Timex Sinclair User

49 La Salle Ave.
Buffalo, NY 14214

Specialty: Sinclair
US\$ 29.95/yr for 12 issues as of June 83
Software available?: N

USA

Timex Sinclair User is a new magazine and the format and content may vary a bit as it learns more about its readers. It seems to be written for a wide range of readers. Instead of the usual articles there are many short 1-3 page items about programming, personalities, hardware reviews, software reviews and applications. Six short program listings were also included in the first issue. The hardware/software reviews and the advertising of available products may be the most useful items.

two/sixteen

PO Box 1216

Lancaster, Pennsylvania 17603
Specialty: TRS-80 II TRS-80 16
US\$ 30.00/yr for 6 issues as of Nov. 82
Software available?: no

USA

The price is a bit high for only 6 issues but the subscription also gives you free counselling and advice with any problems relating to the TRS-80 model II and model 16. It is written mostly for novice users who need articles such as "A Review of Snapp-Wares SNAP-II" and "Its Broke or What to do When Your Computer Fails". There are also a few programming tips and examples plus limited advertising. Though advertised as being for professional and scientific readers the contents appeal to a more general group. The July-Aug. 82 issue had 32 pages. (It is also sold at Vijay Bookstores in India!)

The User's Guide

Box 3050

Stanford, California 94305
Specialty: CP/M
US\$ 18.00/yr for 6 issues as of Nov. 82
Software available?: no

USA

A new publication, The User's Guide is dedicated to the CP/M user. It is primarily a how-to magazine. The first issue had articles on "Learning to Use CP/M", "Using CompuServe", "Preventing Computer Disasters" and a "CP/M Quick Reference Guide". The articles are well written and illustrated and are directed towards the novice user and users with little experience. There is little advertising perhaps because it is still a new publication. The Oct.-Nov. 82 issue had 60 pages.

Visigroup

PO Box 254

Scarsdale, New York 10583
Specialty: VisiCalc SuperCalc

5 Place du Colonel-Fabien
75491 Paris Cedex 10

Specialty: general
FF 140/yr for 10 issues as of Oct. 84
Software available?: n

France

Votre Ordinateur is primarily dedicated to home computing. Some sample titles from a recent issue include "Comment fonder un club", "Les sept visages de l'acheteur", "BASIC: jouons avec les nombres" and of course "Conseils a des parents programmeurs". Occasionally some very short program listings are included. The October 84 issue had 98 pages.

Washington Apple Pi

PO Box 34511
Bethesda, Maryland 20817

Specialty: Apple
US\$ 18.00/yr for 12 issues as of Nov. 82
Software available?: no

USA

This users group has a library of over 80 disks which can be purchased for US\$ 7.00 each by members (non-members pay US\$ 10.00 each). The newsletter is well done and includes programming tips, listings, software reviews and question/answer columns. There is also a bit of advertising and news of other users groups. It is one of the better newsletters and rivals a few magazines. The Nov. 82 issue had 52 pages.

Which Computer?

Durrant House
8 Herbal Hill
London EC1 B 1PA
G. Britain

Specialty: general
BrSt. 18.00/yr for 12 issues as of Feb. 83
Software available?: n

Which Computer? is written for the business user of microcomputers. Sample titles are "MGE Personal Tax Planning", "Secondhand IBM Systems", "Third Party Maintenance" and "Survey of Hand-Held Terminals". Regular sections review business software, new products, hardware and computer suppliers. The Feb. 83 issue had 122 pages.

Which Micro?

Competition House Specialty: general
 Farndon Road, Mkt. Harborough BrSt. 10/yr for 12 issues as of Dec. 82
 Leicestershire Software available?: n
 G. Britain

This magazine specializes in hardware such as computers and accessories. Articles review different microcomputers and short notes tell about new equipment releases. There is some software information but hardware is definitely the focus. Sample titles are "The Lynx and the Colour Genie", "Microwriter and Newbrain", "Xerox 820/11" and "Buyer's Guide". There is much advertising for small and medium sized micros. If you need information on British microcomputers this is a valuable source. The Dec. 82 issue had 118 pages.

Your Computer

Oakfield House Specialty: general
 Perrypoint Rd., Haywards Heath BrSt 9.00/yr for 12 issues as of Aug. 83
 Sussex RH16 3DH Software available?: y
 G. Britain

Your Computer is written for the small home computer user. It concentrates on publishing short programs plus an instructional article about each one. Some articles are purely instructional and do not offer useable programs. Sample titles are "Spectrum Timeslider", "ZX-81 Compiler", "Orie Centipods" and "BBC Compactor". There is very much advertising for equipment and software. The August 83 issue had 26 program listings in 202 pages.

ZX Computing

513 London Road Specialty: Sinclair
 Thornton Heath Br St 11.50/yr for 6 issues as of Sept. 82
 Surrey CR4 6AR Software available?: ?
 G. Britain

CROSS-CLASSIFICATION BY SPECIALTY

Most publications tend to specialize in one computer, operating system or language. A few such as '68' Micro Journal are aimed at computers using a generic class of CPU's. The following listing presents the periodical names in this directory classified by computer, operating system or language. It has not been possible to obtain sufficient information about a few periodicals and these are not included in the list.

PUBLIC DOMAIN SOFTWARE

An asterisk indicates that the periodical also is a source of software. The form of the software is quite varied. In some cases it simply indicates that the magazine has a significant number of program listings. In other cases the periodical may represent a users group which has a library of public domain software on diskette. Finally the publication itself may be in the form of a cassette or diskette containing programs and text files. Check the full description of each periodical for more detailed information.

Public Domain Software is free of copyright restrictions when used in a non-commercial application. That means you may use it, make copies or modify it but you cannot sell it or use it in a business. It is available for a small fee such as US\$ 1-5 plus the cost of a diskette. Although documentation is normally poor (or nonexistent) and bugs are guaranteed, it is a source of very low cost software. In many cases some small corrections will make a one dollar program work as well as a one hundred dollar commercial package. In rare cases (i.e. MODEM 7) public domain software is much better than most commercial software. In a few cases the programs simply refuse to work and your money is wasted. Do not expect miracles.

CROSS-CLASSIFICATION BY COUNTRY OF PUBLICATION

The following listing cross classifies the periodicals listed in this directory by their primary publishing country. A few such as Computerworld are published in several countries and these are listed separately. At the present time most of the US periodicals have been catalogued. Unfortunately very few non-US periodicals have been found. If you know of a periodical which is not included in this list you are welcome to drop a note to us with its name and address or even better, send a sample copy.
