How To Have A Beyond Ready 4-H Club

Contact: Christine Heverly sisungch@msu.edu

September 22, 2026 Noon-1:00 pm
Via Zoom

Strong clubs don't happen by accident. They are intentionally designed to help youth discover their sparks, experience belonging, build meaningful relationships, engage in leadership, and connect to the larger 4-H community. Join this webinar to explore practical strategies for creating a Beyond Ready 4-H club where every young person can thrive. You'll leave with ideas and resources to intentionally design club experiences that foster positive youth development and prepare young people with the skills they need for success in school, work, and life.

through 4-H**

Beyond Ready

4-H programs create intentional opportunities for youth to build essential work readiness skills that prepare them for future success. Through structured, hands-on activities, young people practice communication, collaboration, problem solving and time management. Volunteers play a key role by guiding youth through meaningful tasks, helping them set goals, and encouraging personal responsibility and follow through.

As youth take on leadership roles, complete project work, and participate in real-world or simulated experiences, they begin to demonstrate growth in professionalism, work ethic and organizational skills. Every activity can help youth connect what they are learning in 4-H to what will be expected of them in the workplace.

How is your club helping youth build the skills they need to be work ready?

#BeyondReady

July 1 - August 7: Michigan 4-H License Plate Promotion Contest

Online

As part of the Michigan State Fair 4-H and Youth Virtual Showcase, youth ages 8-19 are invited to create a video or non-video promotional piece encouraging others to purchase the 4-H license plate.

Going home: Biosecurity tips for animals that travel off the farm

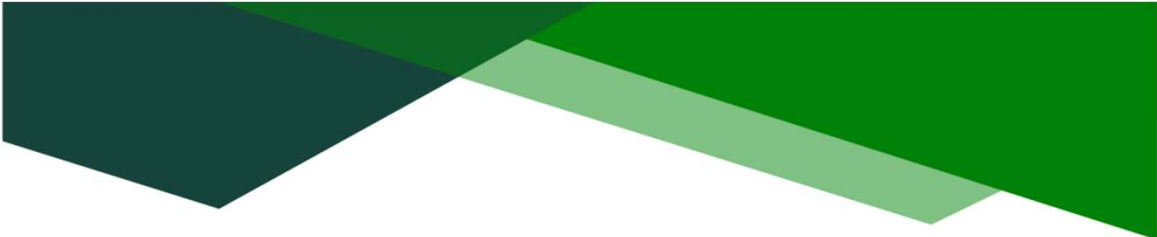

Adapted from: https://www.canr.msu.edu/news/biosecurity_tips_for_animals_that_went_to_the_county_fair.

Animals that are exhibited at the county fair, jackpot shows, and other exhibitions are likely near and dear to their exhibitor's hearts. [Michigan State University Extension](#) offers these biosecurity steps exhibitors can take to protect their show animals and those that were left at home once the event has ended.

- Keep animals that left home separate from animals that did not for a minimum of 14 days. If at all possible, do not allow nose-to-nose contact and provide as much distance between animals.
- Disinfect all buckets, feeders, tools and footwear that left home.
- Throw away any feed or hay that left home.
- Always wear clean clothes and footwear. Boot coverings may be helpful when caring for isolated animals.
- Take care of animals that stayed home from the show first, and animals that were at the show second. Do not go back and forth between animals as this increases the risk of cross-contamination.
- Do not eat or drink in the barn.
- Observe animals daily for signs and symptoms of illness, such as:
 - Obvious pain or discomfort
 - Decrease in appetite and water intake
 - Fever
 - Lethargy
 - Diarrhea or changes in consistency in manure
 - Discharge from nasal cavity or eyes
 - Overall weakness

Care of animals after traveling is just as critical as their pre-show care. Exhibited animals were exposed to new animal populations and fair-goers, and will typically experience a lot of stress during their time away from home. By practicing these biosecurity steps, you can help keep all of your animals safe and healthy.
