District 12 goals and expected performance.

Conducting On-Farm
Research for Improving
Rangeland Management

Improved Water Quality
Supported by SIDMA

Active IWR Projects In District 12

Social Indicators Data Management and Analysis Online Tool Upgrades

This initiative modernizes the Social Indicators Data Management and Analysis (SIDMA) platform—an essential, free, online national tool for watershed and conservation program evaluation. SIDMA's updated usability, functionality, and accessibility will help agencies and watershed groups better track behavioral and social outcomes that lead to improved water quality and reduced nonpoint-source pollution.

Healthier Streams, Wetlands and
Lakes For A Healthier Michigan!
