Bee smart about in-hive pesticide applications!

SCAN ME

Scan for a list of EPA-registered products for *Varroa* mite control

Bee smart about in-hive pesticide applications. Use EPA-registered products for *Varroa* mite (*Varroa destructor*) control.

See the EPA Advisory for
Beekeepers for more
information!

Registered pesticides have been evaluated by the EPA to ensure they will not cause unreasonable adverse effects to human health or the environment when used according to the label directions.

Using unregistered pesticides may result in residues in foods derived from hives, such as honey, pollen, and comb, that would result in adulterated food under the Federal Food, Drug and Cosmetics Act (FFDCA).

Use of unregistered pesticides could be a violation of state laws, and sale and distribution of unregistered pesticides, including transportation of treated hives, could violate FIFRA.
